

# Web/Mobile Application Development

BKP Technologies, Inc. has extensive experience developing web and mobile application software for the life sciences industry. Our team of talented software engineers and developers builds applications using a proven software development lifecycle (SDLC) methodology. We work closely with client stakeholders to deliver custom solutions that meet your user and business requirements.

## Web/Intranet Application Development

We encourage you to contact us for a no-cost discussion to review your company's unique web/mobile application needs.

- Development following a proven software development lifecycle
- PHP, Adobe ColdFusion, Microsoft ASP.NET platforms
- Research/Discovery, Pre-Clinical, Clinical Data Management, Pharmacovigilance, and Business applications
- Integration with existing systems and databases
- Fully validated solutions for regulatory applications

## Mobile Application Development

- Development following a proven software development lifecycle
- Google Android, Apple iOS, and HTML5 web applications
- Integration with existing systems and databases
- Fully validated solutions for regulatory applications

Our solution development services are delivered by consultants and engineers with 10-20+ years of experience in developing software in life science and regulated environments. Our team will work with your internal resources to ensure effective knowledge transfer and to provide cost effective solutions and services that meet your research, business and regulatory requirements.
